

CLAIMS

What is claimed is:

1. A wrapped bolster seal for doors of a motor vehicle comprising:
at least two door panels, further comprising one being the wet side door
5 panel and the other being the dry side door panel;
a rib; and
edge wrapping layers around said wet side door panel.
2. The wrapped bolster seal as in claim 1, said rib is placed on said wet side
door panel.
- 10 3. The wrapped bolster seal as in claim 1, wherein said rib is higher than the
maximum thickness of individual said edge wrapping layers.
4. The wrapped bolster seal as in claim 2, where said wet side door panel is
joined with dry side door panel; said rib creates a seal so that said edge wrap layers will
remain dry regardless of conditions.
- 15 5. A wrapped bolster seal for doors of a motor vehicle comprising:
at least two door panels, further comprising one being the wet side door
panel and the other being the dry side door panel;
a rib;
edge wrapping layers around said wet side door panel; and
20 a foam-like material.
6. The wrapped bolster seal as in claim 5, wherein said foam-like material is
placed on dry side door panel and said rib is placed on said wet side door panel.

7. The wrapped bolster seal as in claim 5, wherein said rib is higher than the maximum thickness of individual said edge wrapping layers.

8. The wrapped bolster seal as in claim 6, where said wet side door panel and said dry side door panel are joined; said rib forms a seal with said foam-like material so
5 that said edge wrap layers will remain dry regardless of conditions.
